

**YOUR SOLUTIONS
PARTNER IN
LABORATORY,
RESEARCH AND
APPLICATION**

COMPANY PROFILE

Established in 2008, ChromStation Sdn Bhd commenced its business in providing expert solutions to the scientific industry in Malaysia as well as South East Asia. The company was formed through the initiative of a team of chromatography specialists that are inspired to extend their technical know-how experience in terms of training, validation and method development to the industry. Knowing there are lack of supports towards these areas, ChromStation strives to deliver the best effort in mastering the instrument usage be it as separation devices and confirmation detectors. ChromStation specializes in not only developing new methods but also in drastically improving current methods for clients in terms of sensitivity, reliability and analysis times.

Catering to the chromatography instrument which include High-Performance Liquid Chromatography (HPLC), Gas Chromatography (GC), Mass Spectrometer (MS), Ultraviolet-Visible Spectrophotometer (UV-Vis), FTIR, Atomic Absorption Spectrophotometer (AAS), Inductive Coupling Plasma (ICP), Thermal Analyzers (DSC & TGA), the company offers products supply, service and maintenance as well as products and applications trainings to its clients.

Besides analytical, ChromStation has also expanded into the life sciences industry from supplies to services of instrument such as Polymerase Chain Reaction (PCR) systems, Genetic Analyzer, Thermal Cycles and others.

To date, with increasing demands from clients, the company also diversified its area of expertise into laboratory related products such as gas generators, consumables, chemicals, standards and certified reference materials.

**To be a top prime selection
in support by customers in
analytical instrument field from
preventive maintenance, training,
validation and method development,
to laboratory consultation and
supplies, with a slogan “Leader in
Serving Science”.**

ChromStation Sdn Bhd Vision

- Omni Tips / Disposables
- High Shear Lab Homogenizers
- Multi-Sample Lab Homogenizers
- Ultrasonic Cell Disruptors
- Bead Mill / Cell Lysing
- Tissue Grinders
- Accessories & Replacement Parts

- Thermocenter
- Incucenter
- Vacucenter
- ICN
- Heatingcenter
- Waterbath
- Cleaners
- Biocenter

LABORATORY EQUIPMENT

- Digestion
- Distillation
- Hydrolysis
- Extraction
- Combustion
- Fibre Analysis
- Shaking
- Heating

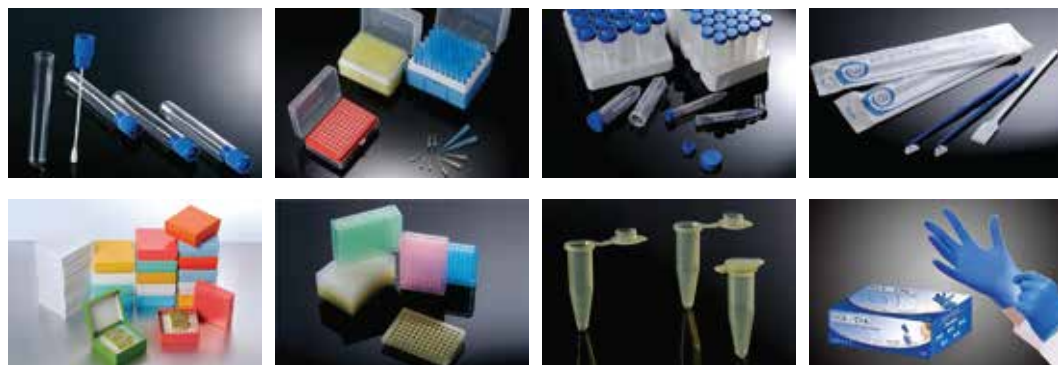

- Centrifuges
- Dewar Flasks
- Dry Ice Makers
- Electrophoresis
- Homogenizers
- Hotplates / Stirrers
- Liquid Handling Products
- Microplate Mixers
- Rockers
- Rotary Evaporators

BIOLOGIX

- Sample Centrifugation & Concentration
- PCR
- Cryogenic
- Liquid Handling
- Tissue Culture
- Microbiology
- Histology
- Drosophila
- Racks and Boxes
- Gloves

CAPP[®] DENMARK

- Mechanical Pipettes
- Electronic Pipettes
- Pipette Tips
- Pipette Controllers
- Repeaters
- Benchtop Solutions

CONSUMABLES

Fortis[™] Technologies Ltd.

- HPLC Columns
- Guards and Filters
- Other Fortis Products

GS-Tek

- GsBP GC Columns
- Venusil HPLC Columns
- Clearnet SPE Supplies
- Cost Effective Syringe Filters
- Chromatographic Supplies

Membrane Solutions

- Vials
- Membrane Filters
- Membrane Products
- Cartridge Filters

- Nitrogen Generator
- Oxygen Generator
- Hydrogen Generator
- Zero Air Generator
- Clean Dry Air Generator

- Industry Water Overall Solution
- Science Laboratory, Ultra Pure Water System

- Line Interactive UPS
- Smart UPS
- True Online UPS
- Inverter

OTHER PRODUCTS | SERVICES | TRAININGS

SERVICES

Every instrument requires proper maintenance to achieve better results in applications, longer life span and minimize downtime. In ChromStation, our engineers are highly capable in servicing various laboratory instrument. With 20 years of experience, we are able to provide services that include troubleshooting, repairing and also preventive maintenance. The instrument that we can service include:

Analytical Instrument

1. Gas Chromatography (GC)
2. High-Performance Liquid Chromatography (HPLC)
3. Mass Spectrometry (MS)
4. Ultraviolet-Visible Spectrophotometer (UV)
5. Atomic Absorption Spectrometry (AAS)

Life Science Instrument

1. Genetic Analyzer
2. Real Time PCR Systems
3. PCR Thermal Cycler

TRAININGS

Consistant trainings help to increase productivity and also enable the usage of newer technologies without much hassle. As ChromStation works closely with various scientific products principals, we are furnished with knowledge coupled with our experience in various applications and products know-how. Hence, we continuously provide trainings in order to assist researchers in their field.

Application Trainings for Products

1. Ultraviolet-Visible Spectrophotometer (UV)
2. Fourier Transform Infrared Spectroscopy (FTIR)
3. Gas Chromatography (GC)
4. High-Performance Liquid Chromatography (HPLC)
5. Mass Spectrometry (MS)
